#### **Company Report**

May 15, 2025

### Q1 Results: Sales Up, But Profits Down YoY. However, Progress Towards Achieving the Full-Year Forecasts is In-Line with Company Plans

For Q1 FY12/2025, JINUSHI (hereinafter "the Company") reported a 2.7% YoY increase in sales, driven by real estate for sale. However, the sales of low-margin warehousing projects led to a decline in gross profit, resulting in a 28.6% decrease in operating profit and a 34.4% drop in net profit attributable to parent company shareholders.

Progress toward the company's full-year forecasts stood at 43.6% for sales and 29.7% for net profit, consistent with its initial plan, which assumes that the bulk of profit will be recorded in the second half.

On the procurement side, activity slowed YoY as the Company strategically limited contracts in specific sectors to maintain portfolio balance. Many of the reduced deals were small in scale, so the decline in contract value was not as sharp as the decline in the number of deals. Meanwhile, the asset balance of JINUSHI REIT, which completed its 9th capital increase in January 2025, rose 16.2% from the previous period to ¥257.6 billion, reflecting strong fundraising conditions.

Relative to TOPIX, the Company's stock price has significantly underperformed due to the major financing implemented in July 2024. However, that financing was conducted because of the Company's confidence in a robust procurement pipeline that supports future earnings. Given the current valuation, which is lower than peers, we expect the stock price to more closely reflect business performance as earnings expand.

Growth in Sales
Projects Drives
Higher Revenue YoY

Gross Profit Margin
Decreased 4.3
percentage points
YoY

In Q1 FY12/2025, the Company's sales rose by 2.7% YoY, driven exclusively by an increase in sales transactions. This uptick reflected both the smooth execution of property sales following JINUSHI REIT's 9th capital increase in January 2025 and the completion of several sponsor-support warehousing agreements, as described below.

Despite higher top-line results, gross profit fell 22.1% YoY to ¥4.17 billion and the gross profit margin decreased by 4.3 percentage points to 13.7%.

The company's revenue can be categorized into flow business revenue, stock business revenue, and others. The size of others is exceedingly small, so the flow business and the stock business account for the majority of the company's total revenue.

There is a large difference in gross profit margin between the flow business and the stock business, and changes in the composition ratio of the flow business and the stock business have a significant impact on the overall gross profit margin. In terms of the percentage of gross profit in Q1, flow business revenue accounted for 76.8%, down from 81.6% in the same period of the previous year. This shift underscores that the margin decline was driven not by a change in segment mix, but by decline in the flow business margin itself.

Flow Business Gross Margin Decline Primarily Due to Warehousing Projects Flow business revenues are equal to real estate sales revenues. They are highly variable, depending on the status of sales of leased land and the profitability of individual properties that are sold, regardless of the supply and demand for the company's leased lands.

The gross profit margin of the flow business for the Q1 decreased by 4.4 percentage points to 10.9% primarily because a larger portion of transactions were warehousing agreements.

This was due to the large projects using "real estate warehousing schemes" sold in Q1. Projects using "real estate warehousing schemes" are one of the functions of sponsor support for JINUSHI REIT, in which properties that would normally be acquired directly by JINUSHI REIT from a third party are acquired by the company in advance and subsequently sold to JINUSHI REIT to optimize acquisition timing for JINUSHI REIT. Projects using "real estate warehousing schemes" generally have low gross profit margins at the time of sale, resulting in lower gross profit margins on flow business revenues.

The company proceeded with these sponsor-support activities as planned; and it anticipates that conventional sales transactions will reassert themselves and drive margin recovery in the second half of FY12/2025.

**Stock Business Gross Margin Remain Stable** 

Stock business is categorized by business segment into leasing income from Real Estate Investment Business (leasing income while holding), Real Estate Leasing Business and Asset Management Business. The composition of stock business revenues also rises and falls as they are affected by increases and decreases in ones of flow business. However, the company's long-term policy is to improve earnings stability by using stable stock revenues to cover fixed costs, and so it is essential that the amount of stock business revenues continues to increase.

**Operating Profit** Margin Declined, but was in Line with **Expectations** 

In Q1 FY12/2025, the Company reported a slight reduction in Selling, General and Administrative (SG&A) expenses to ¥1.22 billion. As a result, the SG&A-to-sales ratio improved by 0.1 percentage points to 4.0%.

Because the gross profit margin decreased more sharply, the operating profit margin declined by 4.2 percentage points YoY to 9.7%. This decline in gross profit margin remained within the Company's initial guidance range, the results were considered to be in line with expectations.

While Quarterly Net Profit Will Decline, **Most Profits are** Expected in 2H

In non-operating activities, the Company recorded a foreign-exchange loss of ¥230 million, compared with a ¥240 million gain in Q1 FY12/2024, reflecting currency movements on loans extended to its U.S. subsidiary. In addition, the Company recognized an extraordinary gain of ¥170 million on the liquidation of its Australian affiliate, New Real Property (no extraordinary gains were booked in the prior-year period). After accounting for these non-recurring items, net profit attributable to owners of the parent declined 34.4% YoY and net-profit margin narrowed by 3.4 percentage points to 5.9%.

The company will refine its sales plan throughout the year to strike an optimal balance between maximizing revenues from individual projects and maintaining financial prudence. It continues to expect the majority of FY12/2025 profits to be realized in the second half, driven by a return to higher-margin sales transactions and the ongoing

contribution of stable stock-business revenues. Q1 results are fully aligned with these strategic assumptions.

#### 2. Recent Trends in the JINUSHI Business

The JINUSHI Business is a model for increasing real estate holdings while maintaining a continuous turnover of funds by taking the following four steps: buying (purchasing) land, leasing land, selling leased land and managing investors' funds.

Of the four steps, the "managing investors' funds" process is handled by JINUSHI REIT which JINUSHI Asset Management, a wholly owned subsidiary, manages and will be described in the following chapter, "Recent Trends of JINUSHI REIT".

### 1) Buying (Purchasing) Land

Agreement-based
Purchases Declined
YoY Due to Strategic
Restraints in Specific
Industries Designed
to Maintain Portfolio
Balance

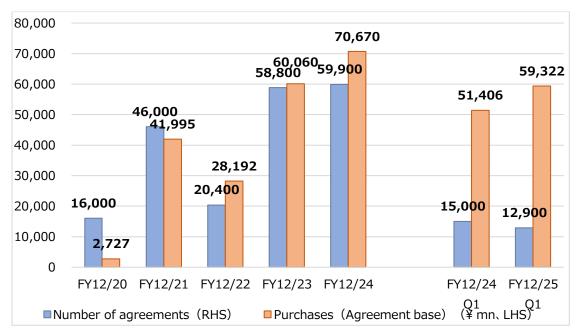

Real Estate Held for Sale Rose 15.4% YoY in Anticipation of Future Sales Growth The number of purchases (agreement basis) for Q1 was 10, down 14 from the same period last year, and the volume of purchases was ¥12.9 billion, down 14.0% YonY.

The reason for the decrease in the number of purchases was that, as funeral halls deals were on the rise, the company took into consideration the balance of its portfolio and strategically restrained purchases related to this industry from the second half of 2024. As deals in this industry were small-scale, the number of purchases decreased by 41.7% compared to the same period last year, while the purchase volume decreased by only 14.0%.

The balance of real estate for sale (booked basis) at the end of Q1 was ¥59.32 billion, up 15.4% from ¥51.40 billion at the end of Q1 of the previous term and is steadily building up in anticipation of future sales increases. Overall, it appears that there are no negative factors occurring in the external environment surrounding procurement.

"Off-balance-sheet Schemes for land" As a Focus Area from FY12/2023 Onwards Since FY12/2023, the Company has prioritized Purchases by "Off-balance-sheet Schemes for land" as a key growth strategy. In situations where the client company owns both land and an operating building, it divests only the land and simultaneously enters into a fixed-term land lease agreement, thereby retaining uninterrupted use of the facility. This scheme preserves operational continuity while strengthening the balance sheet through the infusion of growth capital, the realization of land-sale profits and the reduction of on-balance-sheet assets. The company estimates the addressable market for such transactions at approximately ¥45 trillion and regards this segment as a high-potential avenue for future expansion.

As of Q1 FY12/2025, the cumulative number of transactions using "Off-balance-sheet Schemes for land" reached 28, with total acquisition proceeds of ¥77.9 billion. The Company is ready to continue to focus on acquiring such transactions using "Off-balance-sheet Schemes for land."

#### 2) Leasing Land

Number of Tenants Increased by 7, Versus the End of FY12/2024 The number of tenants with long-term fixed-term lease agreements with the company increased by 7 companies from the end of FY12/2024 and reaching 147 at the end of Q1.

The company's tenants include supermarkets, which accounted for 27 of the 147 tenants at the end of Q1, then followed by drug stores (12), automobile dealers (11), restaurants (10), funeral halls (9), factories & warehouses (9), home improvement stores (8) and large electronics stores (8). As a mid-to-long-term policy, the company is trying to expand its tenant base to include businesses that serve social infrastructure.

#### 3) Sales

The company has been relentlessly buying land and then leasing it out to tenants, turning it into a real estate financial product that generates long-term stable cash flows, which it then sells to funds such as JINUSHI REIT and other investors. As of the end of Q1 FY12/2025, the company has cumulatively been involved in 443 projects worth roughly ¥553.4 billion.

Although many tenants have historically come from the retail industry, esp. supermarkets, who have been the most common type of tenant, they still account for less than 24% of the total tenant base. In terms of region, about 82% of the company's development projects are in the Tokyo, Nagoya and Osaka areas, and approximately 43% are in the Tokyo metropolitan area (Tokyo, 3 prefectures, and Ibaraki prefecture), but there is no concentration of development in any one specific area.

The percentage of sales by JINUSHI REIT and group companies (sponsor pipeline support ratio) is 68.3%, including bridge schemes, cumulatively from FY03/2017 to Q1 FY12/2025. A bridge scheme is a "sale of properties by JINUSHI and group companies where the buyer is a third party designated by JINUSHI Asset Management (usually JINUSHI REIT, but not always)" and it grants preferential negotiation rights for acquisition to a third party designated by JINUSHI Asset Management (in effect, presumably the JINUSHI REIT). The intermediary is a bank-affiliated leasing company.

In addition, the company sets the approximate time from land purchase to sale at 1 to 1.5 years, emphasizing the extent of the turnover of the funds.

#### 3. Recent Trends of JINUSHI REIT

JINUSHI REIT Low-Risk, Low-Volatility JINUSHI REIT, managed by JINUSHI Asset Management, a wholly owned subsidiary, is the only private REIT in Japan that specializes in leased land. The product concept is based on an LTV level of approximately 20-40%, with an emphasis on financial stability and a distribution yield of approximately 3.5% per annum. As for its track record, since the start of operations, the fund has operated at an LTV level of about 30% and a distribution yield of about 4.0% per annum, and these levels are expected to be maintained even at the time of the completion of the 9th offering, currently scheduled for January 2025. The fixed loan ratio at that time is also expected to be 100%, with an average remaining loan term of 5.1 years.

JINUSHI REIT'S AUM is ¥257.6 billion After the 9th Offering in January 2025

As there are no other REITs that specialize in leased land, either listed or privately placed, it has been accepted by investors as a financial product that offers unique investment opportunities, and the size of its assets has expanded since the start of operations in 2017. The balance of assets under management was ¥257.6 billion as of January 9, 2025, after the completion of the 9th offering, and is expected to increase to ¥300 billion during FY12/2026.

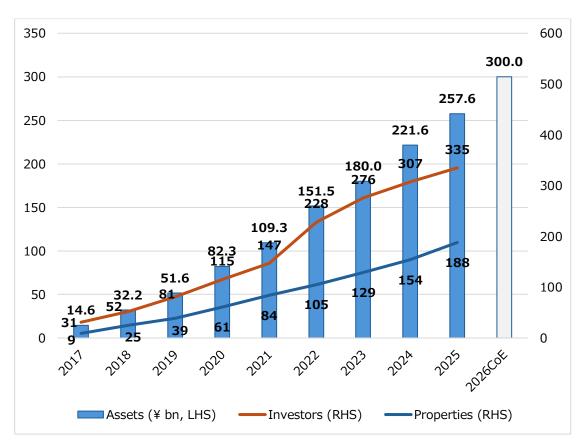

Figure 7. JINUSHI REIT (Private REIT for Leased Land) AUM Growth

Source: Company data compiled by Strategy Advisors

JINUSHI REIT's Portfolio is Heavily Concentrated in 3 Retail Sectors After the completion of the 9th capital increase in January 2025, JINUSHI REIT's portfolio comprised 188 properties under management. Relative to the Company's broader development pipeline, these assets are disproportionately concentrated in 3 core tenant sectors; supermarkets, home improvement stores and drugstores.

#### 4. Business Outlook

Company Plan for FY12/2025 Remains Unchanged

Sales are Expected to Increase, Underpinned by the Opening Balance of Real Estate Held for Sale For FY12/2025, the Company forecasts sales of  $\pm$ 70.0 billion( $\pm$ 22.7% YoY), operating profit of  $\pm$ 9.5 billion ( $\pm$ 9.5% YoY) and net profit attributable to owners of the parent of  $\pm$ 6.1 billion ( $\pm$ 0.2% YoY). These full-year forecasts remains unchanged upon the release of Q1 results.

As illustrated in Figure 4, the balance of real estate for sale at the beginning of FY12/2025 increased by 17.7 % compared to the beginning of the previous fiscal year. This uptick underpins anticipated sales growth, as the favorable land-acquisition environment that prevailed in FY12/2024 is expected to continue into FY12/2025.

Despite Declining Margins, Operating Profit is Projected to Rise on Higher Gross Profit Approximately 70% of the Company's gross profit comes from the flow business and purchases are decided based on various conditions such as the size of the project, the period from purchase to sale and the balance with the surrounding market price in the project's area. Therefore, gross profit margins are merely results, but looking ahead to projects scheduled for sale in FY12/2025, it appears that the gross profit margin is expected to decrease from the previous fiscal year.

As a result, the operating profit margin for FY12/2025 is expected to be 13.6%, down 1.6% from the previous fiscal year. However, the company plans to increase operating profit thanks to the increase in gross profits.

The Slight Uptick in Net Profit Reflects the Impact of FOREX Gains & Losses The Company has foreign exchange gains/losses related to loans to its U.S. subsidiary, and it considers that it will be affected by foreign exchange fluctuations. The company's plan calls for an assumed USD/JPY rate of ¥150 for FY12/2025, compared to the actual USD/JPY rate of ¥158 in FY12/2024 (a margin gain will be realized if the yen depreciates against the assumed exchange rate at the end of the period). As a result, a foreign exchange gain of 350 million yen was recorded in FY12/2024, but a foreign exchange loss of 210 million yen is expected in FY12/2025.

In addition, due to the liquidation of the Australian subsidiary, there will not be the 350 million yen reduction in income taxes that occurred in the previous year, but an extraordinary gain of about 500 million yen is expected (of which 170 million yen was already recorded as of Q1 FY12/2025).

These factors are the reason why net profit attributable to owners of the parent company will be only slightly higher than the previous year.

#### 5. Stock Trends and Valuations

To see how the company's stock price has changed over the years, Figure 8 shows an index of the stock prices of major real estate finance companies and the TOPIX (Tokyo Stock Exchange Stock Price Index) when the stock price at the end of 2023 is set at 100.

Overall, the Stock Market Experienced Volatility in August 2024 & April 2025 In 2024, the Japanese equity market trended higher, led by large-cap issues and reached its year-to-date peak in July. Thereafter, the market gave back gains and, following a sharp yen appreciation in August that sparked a brief sell-off and rebound, entered a protracted consolidation phase. In April 2025, U.S. President Trump's announcement of mutual tariffs injected fresh uncertainty into global markets, triggering pronounced volatility in Japanese stocks alongside their international peers.

Since 2024, JINUSHI Has Significantly Underperformed TOPIX Twice

In the period under review, the Company's relative share performance registered two notable underperformances against the TOPIX. The first downturn occurred on February 13, 2024, when the Company released its FY12/2023 full-year results, which showed year-on-year declines in both revenue and profit. This outcome heightened investor concerns about the feasibility of the FY12/2024 plan, driving the stock below the TOPIX.

Thereafter, the share price rebounded: the Q1 FY12/2024 results announced in May confirmed satisfactory progress against full-year targets, and Daiwa Securities'

Relative Stock Prices Remained Well Below TOPIX due to the Impact of Major Financing in July 2024 initiation of coverage with a Buy recommendation in June provided further upward momentum, at times lifting the Company's stock above the TOPIX benchmark.

The second relative underperformance occurred on July 11, 2024, when the Company announced a significant public offering. The ensuing dilution drove the share price sharply lower, causing the stock to fall below TOPIX and remain depressed relative to the index thereafter.

The company needs to continue expanding its purchasing in order to expand its business, and this public offering has secured sufficient funds for future growth. Nevertheless, investors are concerned that the company may need to increase capital again to acquire funds for purchasing, which is thought to be one of the reasons why the relative stock price is below the TOPIX. In addition, this fundraising represents the company's confidence in expanding purchasing and future growth, but due to the business structure in which flow revenue accounts for the majority of revenue, when looking at performance over a short quarterly span, it is surmised that this is also having an impact on the company's confidence in growth, which has not yet been reflected in its actual figures.

At present, the stock trades at a PER of  $7.1\times$  and a PBR of  $1.0\times$ , levels that appear attractive on a valuation basis. Among peers, only Sun Frontier Fudosan (8934 TSE Prime), Loadstar Capital (3482 TSE Prime) and Hoosiers Holdings (3284 TSE Prime) exhibit lower PER's, while the Company, Sun Frontier Fudosan and Hoosiers Holdings share the lowest PBR of  $1.0\times$ .
